Fugitive

This is primarily an action driven thriller. It can be read as a standalone novel. There was enough back story supplied to gain an understanding of how Max and Carla came to be together, and of past missions for the shadowy Organisation. To my mind it wasn't as dark or as gritty as I would have thought with this type of thriller. I have to say that some of the events in this novel did defy belief.

To my mind the most interesting character was Star and I would have liked to have known more about her. Star had the potential to be a standout and I would have enjoyed seeing her take a more dominant, central roll.

This novel could have really benefited from the services of an editor or several ruthless beta readers. The misuse of commas was distracting to say the least. The liberal insertion of commas halted the flow, rhythm of the story and I often had to go back and re read sentences. After a while it became irksome. There were a few typos i.e flue instead of flu but they were minor.

A lot of the dialogue didn't ring true and came across as wooden for the characters. It didn't tie in with how Max, Carla and Star were portrayed.

I enjoyed the ending, can't say more without giving away spoilers. Whilst this novel certainly isn't character driven there were plenty of action scenes supplied for this type of novel.

Looking for action? This is the book for you, but be careful not to get caught up in the details and spoilers along the way!

I was very confused by the genre of this book. It's clear that Day has talents in many areas but I felt he attempted to combine too many things into this volume. This selection did not read like a mystery/thriller it felt more like a sci-fi/action read. My expectation was that it would have been darker and focused more on the characters which ideally would have remained involved with murderous scandal. However the interaction of fast machines, unrealistic creatures, chase scenes, random sex, all twisted together with government secrets left me feeling like I was watching a bad action movie.

I look for books that read quickly and give me a story that keeps me guessing along the way. In my opinion this book fell short of those expectations. The numerous actions and different scenarios kept the reader guesstimating what setting would come next, however, there was not much left to the imagination about how things would turn out because the chapter titles revealed the climax of the section. I think for me that was the worst part of the novel, I kept thinking why am I bothering to read this when I can assume I know what happens!! I like a novel to flow and to make me guess about what's ahead, not to tell me the surprise and then play out the details for the next 5-10 pages.

My next concern was the use of excessive description which seemed over the top for me. It doesn't take much for me to know what's going on in a story and I don't necessarily need to know every last detail when it comes to the scene. I felt especially in the beginning portion of the story that the descriptions of the scene felt more like Day was trying to describe a movie scene to a blind man. Also the dialogue throughout did not feel natural and I found myself re-reading sections to understand completely what was being said.

On a positive note being the third in a series this book this was able to be read as a standalone piece. I have not read the first books and was able to understand where characters were coming from and how they fit in the current setting. I also liked the fact that all of the characters were faced with a common problem and that all of them were able to interact at the end. That being said I don't think enough time was left to wrap up the book and as a result the end sort of felt rushed. I was disappointed that I waded through all of the monotonous details in the beginning to have everything end in a quick minute.

Overall, the book was decent if you're looking for something to occupy your brain and not make you think too much. It's not a must read and really not something I would be recommending to my friends.

Gripping read!

By Amazon Customer

"Fugitive" is definitely a must-read for every spy thriller fan. It has everything: a quickly paced narration that keeps you on edge, interesting characters, exotic locations, government conspiracies and even a deadly virus threatening to wipe out the Earth population.

Max and Carla, two agents working for the Organization, get separated when Carla is kidnapped by her father Philippe; Max loses his memory in the accident while pursuing their car, and the two will have to go through hell to find each other once again. Russian mobsters, mentally unstable Max's new girlfriend Star and the dangerous task concerning the pharmaceutical company in New York would make their reconciliation seem impossible, but there's nothing Carla won't do to save her beloved one.

Impossible to put down, "Fugitive" made me want to read the other books in the series. Great, gripping read!
