The Wizard provides mathematically-correct strategies

By Michael Bluejay

First a disclaimer: I work for the Wizard and I edited this book for him. That said, one reason I work for him in the first place is because I respect that he knows what he's talking about. He's the worldwide authority on gambling math, and his website WizardOfOdds.com is the definitive resource on proper gambling strategy.

Gambling 102 assumes the reader already knows how to play the games, which is why it's not called Gambling 101. In Gambling 102 the Wizard shares his strategies for a whole host of casino games, as well as for NFL sports betting, where some of the most interesting content is. There's also some info on slot machines you haven't read anywhere else, as well as rankings for hands in Texas Holdem poker.

Perhaps the best thing about this book is that it's written by an expert. There are so many gambling books out there written by hacks who are just guessing. Not this one, this is the real deal.

The best gambling book. Peirod.

By Carnth

Most of the gambling books out there try to sell you on the idea of "beating the house," "making money at the casino," or tell you "You can beat the odds."

This books doesn't do any of that (thank goodness!). In fact, this book doesn't even tell you how to play any of the games. It assumes you already know the basics, but want to take a deeper look at how the different games operates (hence the "Gambling 102" title).

Michael "The Wizard of Odds" Shackleford's "Gambling 102" dives right in with top-notch, in-depth mathematical analysis of each of the most popular table games played in casino. You get the straight facts on how much you can expect to loose (or win) when playing the different games, and making different bets. By taking a statistical look at all the various games and different bets in each game, Gambling 102 provides a wealth of figures that show exactly how big the "house edge" is. For instance, did you know the best bet in the casino is the "Odds" bet on the craps table? The worst bet is on the Big 6 money wheel.

Each game is has it own chapter and is broken do into individual bets. The blackjack section also includes a chart that tells you when to hit, stand, split and double down; so you will always make the best choice when at the table. Tips like these will help maximize your money while at the casino.

I enjoyed reading about the "house edge" on my favorite casino games, and will definitely adjust how I play the next time I go to a casino.
