Shortwave Broadcast Guides) By Gayle Van Horn

# **INTERNATIONAL SHORTWAVE BROADCAST GUIDE: SUMMER 2016 (SEMI-ANNUAL INTERNATIONAL SHORTWAVE BROADCAST GUIDES) BY GAYLE VAN HORN PDF**

Teak Publishing is pleased to announce the release of the Summer 2016 International Shortwave Broadcast Guide (ISWBG) electronic book by Amazon bestselling author Gayle Van Horn, W4GVH. This all important semi-annual information resource is your electronic guide to the world of shortwave radio listening.

Shortwave radio listeners are routinely entertained with unique perspectives to events, music, culture, history, and news from other countries that you won't see or hear on your local or national broadcast channels. Shortwave radio broadcast aren't restricted by country borders or oceans, and can propagate thousands of miles, reaching millions of listeners worldwide, in over 300 different languages and dialects. These worldwide transmissions are monitored on internationally assigned radio frequencies between 1700 kHz and 30 MHz.

There are even broadcasts from the dark side, transmitted from broadcasters known as clandestine or clanny stations. Clandestine broadcasters are wrapped in mystery and intrigue, and they usually exist to bring about some sort of political change to the country they are targeting. Programming may largely be half-truths or sometimes even outright lies, but it is essentially propaganda for their cause.

Listeners who live in the United States can easily hear shortwave broadcast stations from Australia, Canada, China, Cuba, Egypt, France, Germany, India, Iran, Japan, New Zealand, North/South Korea, Saudi Arabia, Taiwan, Turkey, United Kingdom, United States, Vietnam, and many other countries if you have an inexpensive shortwave radio receiver, and you know when and where to listen!

If you want to get in on the action, then this Amazon electronic book is your ticket the travel the world via radio. The ISWBG is a 24-hour station/frequency guide to "all" of the known longwave and shortwave radio stations currently broadcasting at time of publication. This unique radio hobby resource is the "only" radio hobby publication that has by-hour station schedules that include all language services, frequencies and world target areas.

New In this sixth edition of the ISWBG is a lead story on clandestine broadcast and broadcasters with the latest schedules and frequencies you need to hear these intriguing transmissions. There is also an expanded special feature on Who's Who in the shortwave radio spectrum. This story covers services and frequencies outside the regular broadcast and amateur radio bands, and includes our new, exclusive Hot HF 1000+ non-broadcast frequency list.

Also new in this edition is increased frequency and station coverage of longwave broadcasters, selected medium wave broadcast frequencies used by international broadcasters, and all known international standard time and frequency stations transmitting worldwide.

This new e-publication edition is a much expanded version of the English shortwave broadcast guide that was formerly published in the pages of the former Monitoring Times magazine for well over 20 years. This one of a kind e-book is published twice a year to correspond with shortwave station's seasonal time and frequency changes.

The International Shortwave Broadcast Guide will have wide appeal to shortwave radio hobbyists, amateur radio operators, educators, foreign language students, news agencies, news buffs, or anyone interested in listening to a global view of news and major events as they happen.

Whether you are an amateur radio operator or shortwave radio enthusiasts, and want to get in on the action outside of the ham bands, then this new electronic book from Teak Publishing is a must in your radio reference library.

VERY Useful Guide!

By Dave In Ohio

Being rather new to the SW DXing, I needed a guide. Most of them were pretty pricey so I decided to give this one a try.

When it arrived, I didn't have a lot of time to review it, just glanced at it and was a little upset. I had expected something with page after page of countries with their frequency listings, much like other guides I'd heard about. This one seemed to have a lot of articles about SWL and only in the back did I find frequency listings.

But the next day I had about an hour to sit and review the book on my Kindle and I discovered how clever Ms. Van Horn had been in her formatting. I realized that the last thing I needed was just a list of frequencies. The gem of the book is the section that divides the day into UTC hours and what frequency in which country is likely to be on the air at that time. After all, what good does it do me to know that Radio Slobovia broadcasts on 1305 if I have no idea of when to listen for them? ( The book also contains a long listing by frequency for identifying those broadcasts that you stumble upon.)

I've looked around the articles towards the beginning of the book and the ones I've read are well written and interesting.

I strongly recommend that the new readers of Ms. Van Horn's guide use the table of contents to skip around and become familiar with the format.

Very useful book at a good price. Ms. Van Horn has herself a new fan :)

Essential reference for SWLs

By Hundedrek

Gayle knows international SW like few others. She used to write a monthly column and directory in the late, lamented Monitoring Times mag. A big reason why I I subbed to it for years. This guide continues the

tradition. The Kindle version is more convenient to use. Now that so many international broadcasters are streaming their programming, Gayle's guide is even more valuable.

So far not what I was looking for. Had ...

By George Stewart

So far not what I was looking for. Had hoped for a more concise schedule for shortwave programs. Maybe I just have not run into it as yet.
